

What is RELLIS?

The RELLIS Campus is a “living laboratory” for development and advancement of new and emerging technologies. Modern facilities support the evolution of ideas as part of the education and research collaboration, the foundation of the RELLIS Campus experience. RELLIS is where ideas take flight!

What is the Academic Alliance?

The RELLIS Academic Alliance is a model for higher-education promoting collaboration rather than competition among 2-year and 4-year institutions on a single campus. At RELLIS you can earn the credentials necessary to begin a career at reasonable cost.

You begin your study with Blinn College, or transfer from another school, and work toward a degree with one of our partner universities in the Academic Alliance on the RELLIS Campus. And best of all, you can be admitted to the university when you start at the community college. We can help you build a degree program best suited to your career objectives. Through the RELLIS Academic Alliance, you obtain the knowledge and skills necessary for entry into the workplace after graduation, knowledge and skills that prepare you for success and advancement in your chosen profession.

Why Engineering and Computing at RELLIS?

There are many reasons to study engineering and computing at RELLIS, including:

- Small classes with much faculty interaction.
- New laboratories and facilities.
- Access to laboratories not normally available to undergraduate students, such as the SCADA laboratory.
- A culture of applied learning.
- Greater opportunities for interdisciplinary study.

And you can purchase Texas A&M sports and recreation passes.

Are you in good academic standing with 24 hours of applicable transfer credit? We have a place for you in the major you want!
